# MedPoint: Your eNRMC solution

Telstra Health's Medication Management solution now includes MedPoint, an electronic National Residential Medication Chart (eNRMC) conformant module that seamlessly connects aged care facilities, prescribers and pharmacies.

MedPoint allows prescribers servicing residential aged care to update a resident's medication chart electronically, removes the manual process of sending charts to the pharmacy for aged care providers, and supports efficient pharmacy workflows.

Aged Care Facility
Reduce administrative burden and create more time for resident care.

Pharmacy
Improve timely provision of medications.

Resident Record

Prescriber
Increase flexibility and reduce medication safety risks.

Integrated clinical and medication software

Unlike many other vendors in the market, Telstra Health provides a fully connected residential aged care solution to ensure one source of truth for clinical, care, medication and eNRMC data with our combined Medication Management and Clinical Manager software.

Market-leading solutions

Our residential aged care software is a market leader in use across more than 60,000 residential aged care beds. This intuitive solution is highly scalable, with more than 55,000 aged care beds utilising the benefits of Medication Management software.

Supports
>60K+
RESIDENTIAL AGED CARE BEDS

>55K+
BEDS USING MEDICATION MANAGEMENT

Features and benefits of MedPoint:

Prescribers can create medication charts electronically – in the facility or remotely – helping to reduce the risks associated with hand-written charts.

Pharmacists can view residents' charts as soon as they are created, which can accelerate the provision of essential medications.

Charts are sent to the pharmacy within MedPoint; reducing the burden of administration for facility staff.

Pharmacy packing software agnostic to ensure facilities have the flexibility to change; with no lock in period.

Skilled, local team members to support you at every stage of your eNRMC journey.

One resident record across our residential aged care solution to reduce risks associated with duplicate data entry and the potential for missed allergies or medication information.

Comprehensive National Aged Care Mandatory Quality Indicator Program (QI Program) reporting, including Polypharmacy, Antipsychotics, and High-Risk Medications.

Hosted in Microsoft's Azure Platform-as-a-Service (PaaS) cloud to provide a secure and scalable solution.

Connecting you with our broader healthcare landscape, with solutions including Medical Director, PowerHealth and FredIT.
