

# Clinical Manager

Discover why we're  
Australia's largest digital  
healthcare provider.

**200+**

residential care facilities  
choose us to care for  
over 80,000 people

**Compliant**

with the strengthened  
quality standards in  
the Aged Care Act

**98%**

customer retention  
rate with 25 years'  
experience in Aged Care

## Run an efficient facility that supports high-quality, safe, personalised care

Clinical Manager equips your staff with smart tools to help streamline daily activities, more informed decision-making and reduce compliance risks. An intuitive interface lets carers see and update a single, unified resident record at the point of care, with tasks, real-time alerts, progress and handover notes.

From within Clinical Manager staff can easily access available My Health Record data, choose from dozens of assessment forms aligned with the strengthened Aged Care quality standards, and use tools to manage and report on AN-ACC funding.

## Rapid rollout with expert support

From the smallest residential care facility to the largest group, our expert onboarding team helps you configure solutions to suit your facility with an industry-leading onboarding process designed to support timely and cost-effective deployment. This includes high-quality training and guidance to help care workers, nurses and administrators get started with their new software, assessments and tools.

**“It's changed the way  
we work for the better.”**

Scalabrini Village Ltd.

**“Our biggest benefit  
is capturing what's  
happening in the moment  
of care delivery.”**

Royal Freemasons  
Benevolent Institution

**“The integration with  
care plans ensures that  
we are always audit-  
ready while improving  
resident care.”**

Pacific Cape Lodge &  
GLAICA House

# Clinical Manager

## Key features

- 
**Easy AN-ACC and funding management:** Clinical Manager contains Australian National Aged Care Classification features to manage funding and clinical solution in the one solution.
- 
**Powerful reporting and analytics:** Offers customisable reports for continuous improvement and strategic decision-making.
- 
**Cloud hosting options:** We offer secure and scalable cloud hosting options to support high performance and Australian data sovereignty.
- 
**Resident-centric care:** Enables near real-time data capture and access at the point of care, helping to reduce the risk of manual errors and improve clinical decision-making.
- 
**User-friendly interface:** Designed in collaboration with Aged Care facilities to be simple and intuitive, helping staff spend less time on admin and more time on direct care.
- 
**Integrated and centralised:** Combines clinical, operational, and funding tools in one platform, offering a centralised view of resident information.
- 
**Compliance and risk reduction:** Continually updated to support national standards and evolving regulations with assessments and features to manage compliance.

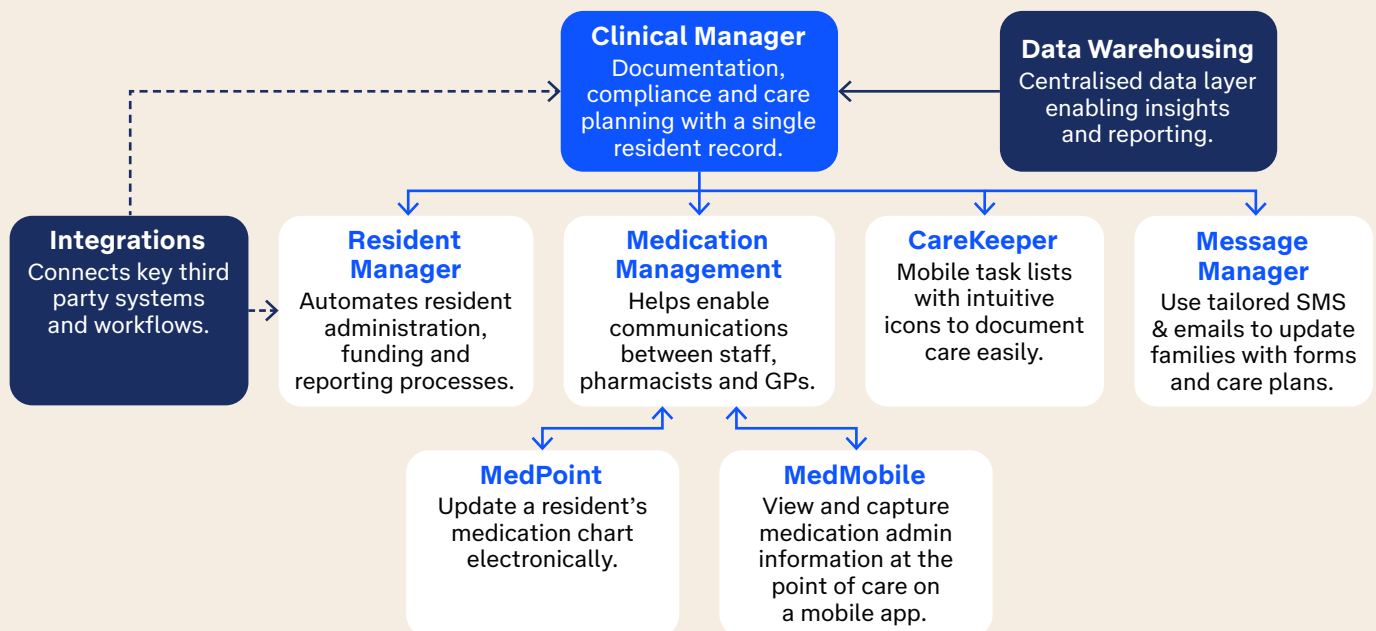

Here for life

### A trusted solution from Telstra Health

At Telstra Health, we're here for life – committed to working alongside governments, clinicians, providers and communities to support better care for all. When you choose our solutions, you benefit from our deep expertise and powerful integrated software designed to connect the health ecosystem and support real-time data, AI-powered workflows and clinically informed solutions. Our mission is to improve population health, free clinicians to focus on high quality care and put people in charge of their own wellbeing.

## Our integrated residential aged care management suite

Our suite of scalable software is designed to improve compliance, funding management and family communications. The centrepiece is Clinical Manager with its resident record providing a single source of truth between carers, clinicians, admin staff and residents with a holistic view of medications, assessments, care plans, admissions and business processes.
